Swiss Water Experience

KWC
INOX

**STEELED FOR
ACTION**

KWC INOX knows that you appreciate good performance. Made of stainless steel, this faucet is as immaculate and robust as its material suggests and is sure to set plenty of new standards in your kitchen – whether it is in terms of material quality, precision or elegance.

In and out

This pull-out aerator has both brains and style. It can extend up to 70 cm if you pull it out, but otherwise retires politely and seamlessly back into the spout.

KWC +

OptimalSpace

Practical yet elegant ergonomic design: OptimalSpace features long, tall spouts that provide ample space for washing and/or working.

PrecisionMove

Exceptional elegance and precision: PrecisionMove allows for seamless movements and exceptional convenience thanks to our consistent use of top-quality materials and superior craftsmanship.

PowerClean

The spray you want at the touch of a button: PowerClean makes it exceedingly easy to switch the flow of water on the spray head – from a standard spray to a fine needle spray.

SprayClean

Actively helps with the removal of limescale: With a special faceplate and fastening mechanism, SprayClean prevents limescale buildup. Any deposits are sprayed away automatically when the water is running. The special fastening mechanism helps with more stubborn lime deposits: simply turn, clean, and the job is done.

TouchProtect

Safe to use: An insulated hot water guidance system with a “double skin” principle means the body of the faucet or the pull-out spray can become warm but never hot. In this way, TouchProtect intelligently prevents scalding.

HealthProtect

Better hygiene and unchanged water quality: HealthProtect highlights the strict standards we set ourselves to ensure that our faucets do not affect the taste and smell of your water – that is why we use high-quality materials (metals, plastics) that are ideally suited for contact with water.

EasyLock

A spray that is easy to use and automatically snaps into place: EasyLock is equipped with special positioning pins that ensure that the pull-out spray is always in the right position.

SprayLock

Adjust the flow: With SprayLock, you can keep the jet of water from your faucet flowing exactly how you want, even when the water is shut off. When you turn the water back on, the water flows in the same way again.

Kitchen

Lever mixer
– Swivel spout 160°
