Swiss Water Experience

KWC
ISLA

All-round
perfection

For some people, design is the number one concern. For others, it might be convenience or quality. Then there are those who simply want everything to be just right. It is for these people that we have designed KWC ISLA: elegant, functional and precise, right down to the smallest detail.

Well-rounded

Your everyday life just got even more enjoyable and convenient: The swivel spout and lever create one striking design ensemble, while the generous swivel range simplifies routine tasks.

jetclean

The jetclean faceplate prevents limescale from building up on your kitchen spray nozzle and does some of your cleaning work for you. When water is flowing, the cone-shaped holes on the faceplate expand, dislodging any limescale deposits. The holes go back to their normal size when the water flow is switched off.

turn and clean (tac)

If limescale deposits build up on the faceplate of your faucet, the turn and clean fastening mechanism will come to your aid: simply turn, clean and the job is done.

Control with contact

The pull out spray gets warm but never too hot thanks to its insulated hot water guidance system.

Precision craftsmanship

Special positioning pins ensure that the spray on the spout is always in the right position.

Jet types

Just one press of the diverter button on the shower head is all it takes to switch from a full Neoperl® spray to a fine needle spray.

Twist-safe

The connecting piece between the pull-out spray and hose prevents the hose from becoming twisted or knotted and makes it easier to work at the sink.

Lever mixer
– Swivel spout 160°
